# *Inca TeraGrid Status*

Kate Ericson  
November 2, 2006

---

# *Outline*

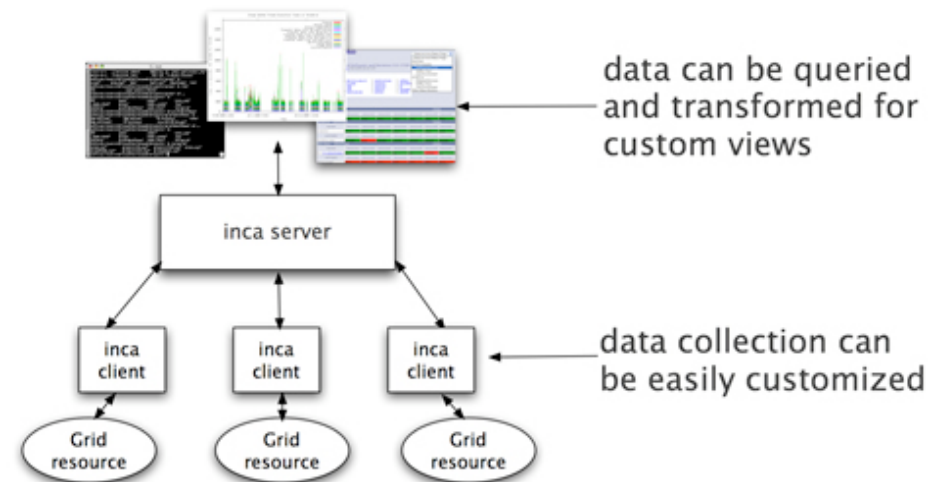

- Inca 2 overview
- CTSSv3 Inca deployment
- Current views of data
- Future work

# Inca

*Inca is a framework for the automated testing, benchmarking and monitoring of Grid resources*

Inca:

- schedules execution of information gathering scripts (reporters)
- collects, archives, publishes data

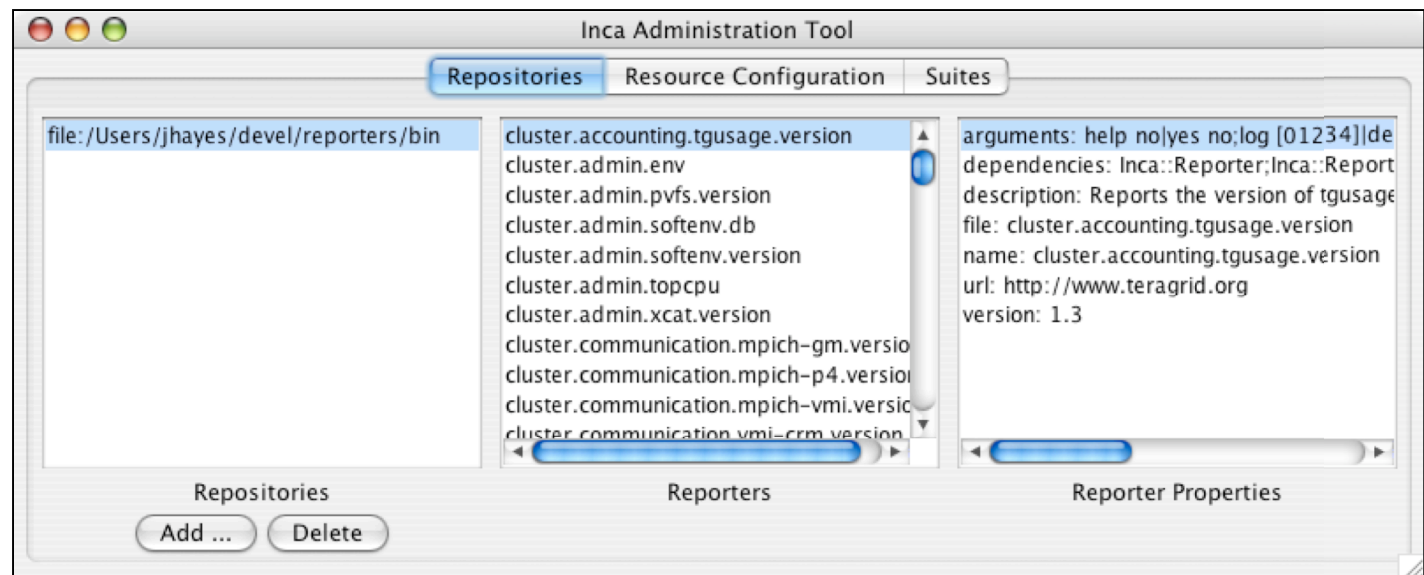

---

## *Motivation for Inca 2*

- Inca 1 was a prototype
- Experiences using Inca:
  - Testing is an iterative refinement process
  - Testing is a trade-off between freshness of data and impact on resource
  - Needed more scalable and flexible data storage

# *Inca 2 Feature: Improved installation and configuration control*

- GUI tool for centralized administration
- Reporter sharing via repositories
- Proxy management via MyProxy

Incat  
screenshot

# *Inca 2 feature: Full Report Archiving*

Inca report - completed

```
...
<body>
  <benchmark>
    <ID>download</ID>
    <statistic>
      <ID>bandwidth</ID>
      <value>105.26</value>
      <units>kb/sec</units>
    </statistic>
  </benchmark>
</body>
<exitStatus>
  <completed>1</completed>
</exitStatus>
...
```

Inca report - error

```
...
<body></body>
<exitStatus>
  <completed>0</completed>
  <errorMessage>wget command
    failed: --15:29:23--
    http://www.nosite/
    => `/dev/null'
  Resolving www.nosite... failed:
    Host not found.
  </errorMessage>
</exitStatus>
...
```

 Inca 1 archiving

 Inca 2 archiving

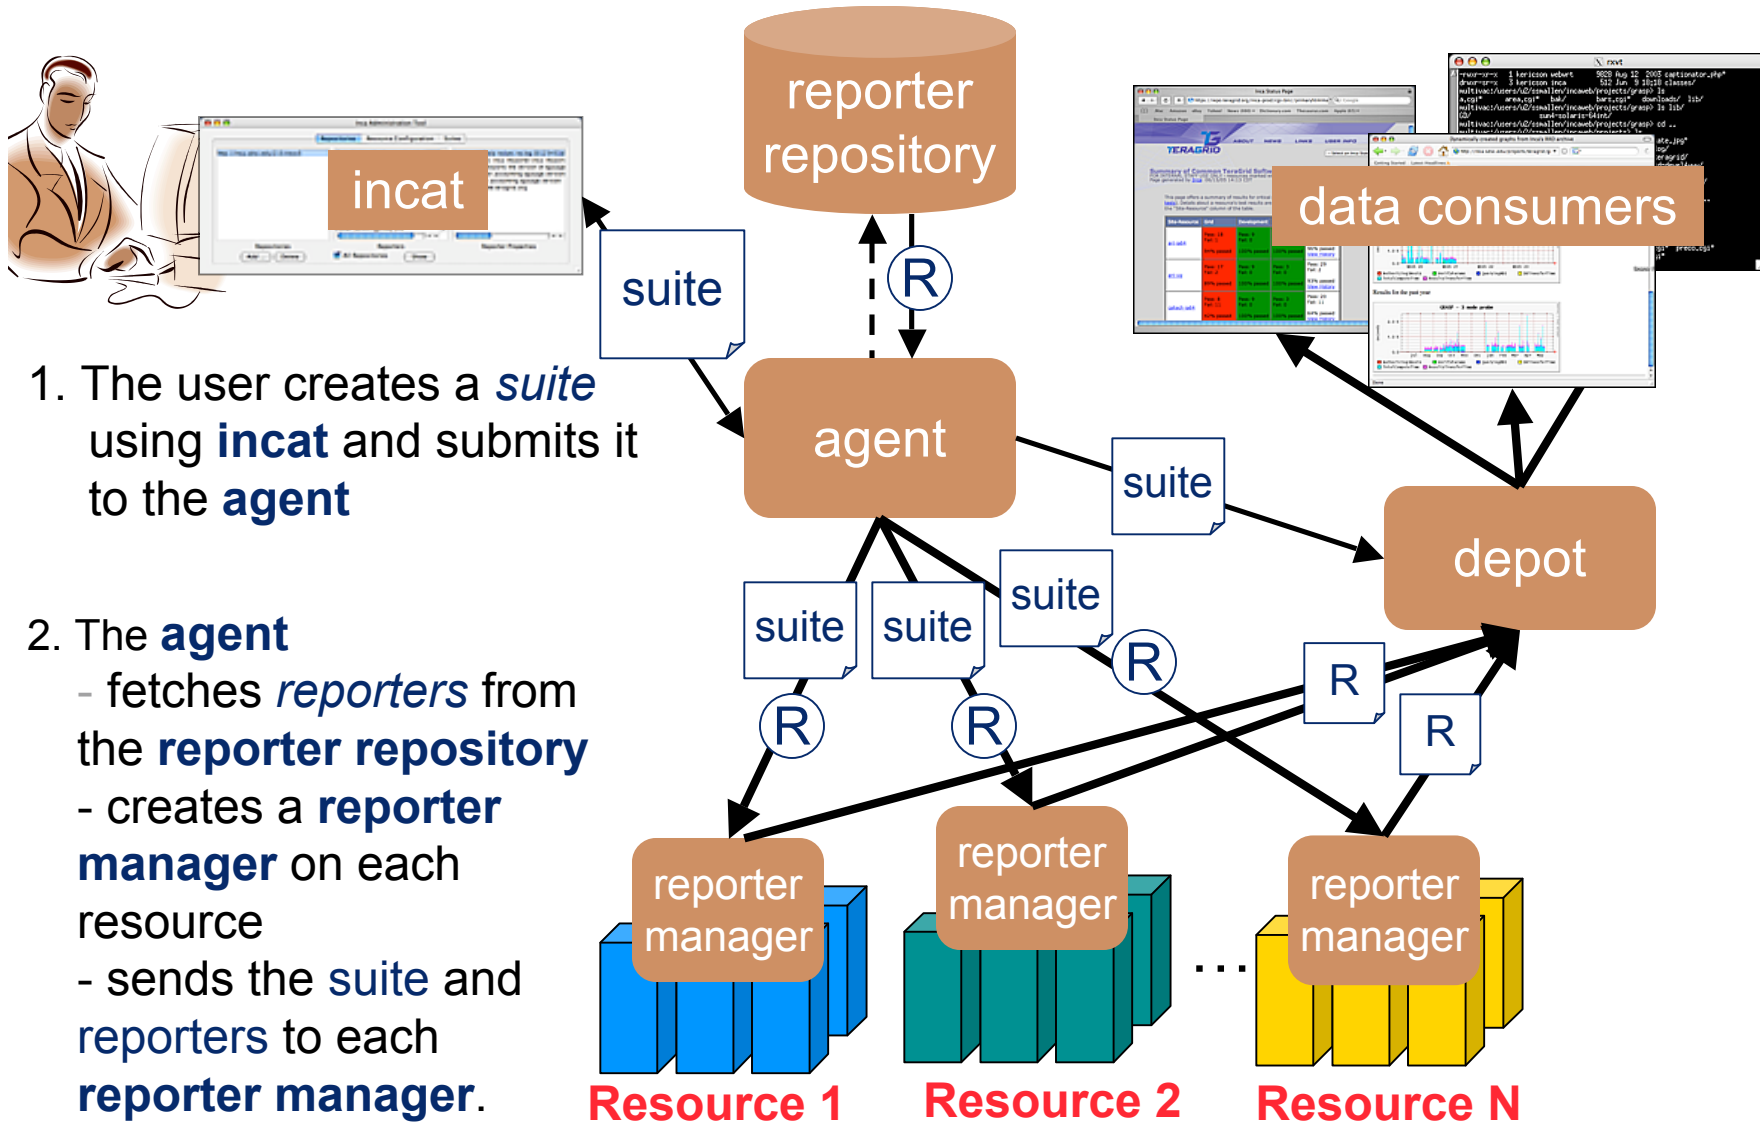

---

## *Inca 2: Additional features*

- Flexible querying interface - relational db backend (postgres for TG)
- Profile reporter system usage
- Inca components communicate using SSL

# Inca 2 Architecture

4. **Data consumers** display collected data (*reports*) by querying the **depot**

---

# *Outline*

- Inca 2 overview
- CTSSv3 Inca deployment
- Current views of data
- Future work

---

## *Inca 2 TeraGrid Deployment: CTSSv3*

32 packages:

Globus, SRB, Condor-G, MPICH, Softenv, etc.

123 possible Inca tests:

45 unit or functionality tests

- **Services:** BLAS, uberftp, etc.

29 compatible version tests

- **Version:** HDF, Condor-g, etc.

49 cross-site functionality tests

- **Cross-site:** Globus GRAM, GridFTP, gsissh

# List of Running Tests

## configured inca reporters

Page loaded: 11-01-2006 03:04 PM (PST)

ctss-v3	(77 reporter series described)
<u>all2all:gram_to @gatekeepers@</u>	Checks that the gatekeeper at a host is accessible from the local machine
<u>all2all:gridftp_to @gridftpHosts@</u>	Verifies the globus-url-copy service
<u>all2all:ssh_to @sshHosts@</u>	This test verifies that you can login and run commands via the SSH service on the remote machine
<u>ant-unit</u>	ant hello world test
<u>ant-version</u>	Reports the version of Apache Ant
<u>blas-level1</u>	This test runs the level1 tests on blas
<u>blas-level2</u>	This test runs the level2 tests on blas
<u>blas-level3</u>	This test runs the level3 tests on blas
<u>compiler-gcc-c</u>	Tests that a specified compiler compiles hello world
<u>compiler-gcc-c++</u>	Tests that a specified compiler compiles hello world

# List of Running Tests (cont)

```
#!/usr/bin/env perl

use strict;
use warnings;
use Inca::Reporter::SimpleUnit;
```

```
my $reporter = new Inca::Reporter::SimpleUnit(
```

NAME:  
grid.middleware.globus.unit.gatekeeper

VERSION:  
2

DESCRIPTION:

Checks that the gatekeeper at a host is accessible from the local machine

URL:

<http://www.ncsa.uiuc.edu/People/jbasney/teragrid-setup-test.html>

SYNOPSIS:

grid.middleware.globus.unit.gatekeeper -help=no -host -log=0 -verbose=1 -version=no  
-help

display usage information (no|yes)

-host

gatekeeper host

-log

log message types included in report

-verbose

verbosity level (0|1|2)

-version

show reporter version (no|yes)

[Click here](#) to view the grid.middleware.globus.unit.gatekeeper reporter.

# Single Result View

## Result:

did not complete

```
globusrun failed:  
GRAM Authentication test failure: connecting to the  
job manager failed. Possible reasons: job  
terminated, invalid job contact, network problems,  
...
```

## Reporter details:

reporter name [grid.middleware.globus.unit.gatekeeper](#)  
(click name for more info)

## Execution information:

ran at	10-31-2006 07:24 PM (PST)
age	20 hours 16 minutes
cron	?=21 ?=21 * * *
ran on (hostname)	tg-login2.uc.teragrid.org
memory usage (MB)	19.0938
cpu time (secs)	2.69336
wall clock time (secs)	181.135

## *Single Result View (cont.)*

### Reporter command log:

Command used to execute the reporter

```
% bash -l -c 'set -a; cd /home/inca/inca2install-ia64; cp ~/.soft.v3 ~/.soft.v3.$$ && soft-msc ~/.soft.v3.$$ && source ~/.soft.v3.$$cache.sh && export PERL5LIB=/home/inca/inca2install-ia64/var/reporter-packages/lib/perl:${HOME}/inca/install-ia64/lib/perl &&/home/inca/inca2install-ia64/var/reporter-packages/bin/grid.middleware.globus.unit.gatekeeper-2 -help="no" -host="gatekeeper.bigred.iu.teragrid.org" -log="3" -verbose="1" -version="no"; rm -f ~/.soft.v3.$${*}';
```

\*System\* commands executed by the reporter. Note that the reporter may execute other actions in between system commands (e.g., change directories).

```
% globusrun -a -r gatekeeper.bigred.iu.teragrid.org
```
