

Monitoring TeraGrid Functionality and Performance with Inca

Kate Ericson
San Diego Supercomputer Center

TeraGrid '07, Madison, WI
June 4-8, 2007

SDSC

Is TeraGrid working?

Can TeraGrid users run their applications? Can they access their datasets?

- Can user login?
- Are Grid services the application[s] use available?
Compatible versions?
- Are dataset[s] N accessible to user X? Credentials?
- ...

TeraGrid '07, Madison, WI
June 4-8, 2007

SDSC

How can user requirements be tested?

User-level deployment testing

- Automated, continuous checking of Grid services, software, and environment
- Installed? Configured correctly?
Running? Accessible to users?
Acceptable performance?
- E.g., gatekeeper ping or scaled down application

TeraGrid '07, Madison, WI
June 4-8, 2007

SDSC

TeraGrid™

Who is testing for?

TeraGrid management

- Responsible for designing & maintaining requirements
- Verify requirements are fulfilled by resource providers

System administrators

- Notified of problems
- Need enough information to understand context of problem

End users

- View results and compare to problems they are having
- Debug user account/environment issues
- Feedback to Grid

TeraGrid '07, Madison, WI
June 4-8, 2007

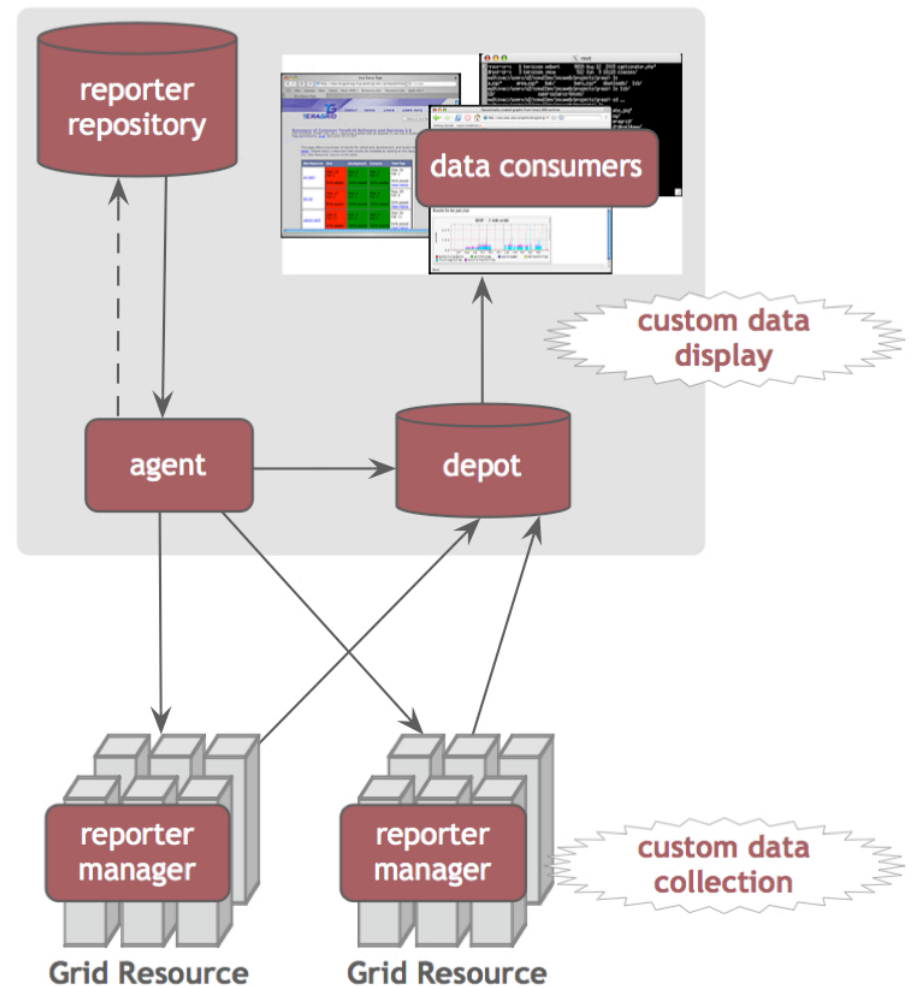

SDSC

Inca

Inca automates user-level testing and benchmarking of TeraGrid's services, software and environment

- schedules execution of information gathering scripts (reporters)
- collects, archives, publishes data

TeraGrid '07, Madison, WI
June 4-8, 2007

SDSC

Some Features of Inca

- Runs under a regular user account
- Archives full reports
- Easy to customize data collection and display
- Profiles and logs test resource use
- Secure (SSL, MyProxy)

TeraGrid '07, Madison, WI
June 4-8, 2007

SDSC

Some Features of Inca

- Test schema is flexible
(can monitor functionality and performance)
- Tests can be run from command line
- Captures test context
- Compares test results to a specification

TeraGrid '07, Madison, WI
June 4-8, 2007

SDSC

Inca on TeraGrid

*TeraGrid*TM

TeraGrid '07, Madison, WI
June 4-8, 2007

SDSC

TeraGrid's Inca Deployment

Currently monitoring all allocated TeraGrid resources at:

- ANL, Indiana, NCAR, NCSA, ORNL, PSC, Purdue, SDSC and TACC

Coordinated TeraGrid
Software & Services (CTSS)

- Coordinated user environment across heterogeneous resources
- TeraGrid VO service agreement

TeraGrid '07, Madison, WI

SDSC

Development Plans

*TeraGrid*TM

TeraGrid '07, Madison, WI
June 4-8, 2007

SDSC

Development Plans

Run now capability for system admins:

- ability to execute configured reporters on demand and send reports to depot immediately
- wiki instructions:
Inca_Information_for_System_Administrators
- password same as repo.teragrid.org

Comments form (near completion):

- staff will be able to view reporter execution details and add their own comments

TeraGrid '07, Madison, WI
June 4-8, 2007

SDSC

Development Plans

Downtime handling:

- tests will not execute during planned downtime and status pages will display news with downtime information

State change reports (weekly ops call):

- report a summary of test status changes for a selected time period

TeraGrid '07, Madison, WI
June 4-8, 2007

SDSC

Custom Science Gateway Status

- Customize views of existing data, in future add new tests for gateway application
- Allow users to test and confirm that their Grid applications' requirements are being met
